

Playwize Ltd (the online gaming sister company of Bits Studios Ltd, The long established video game developer), currently has vacancies for an artist to join our online gaming product development team. Playwize recently launched Pokerwize our innovative new online poker client with offline game and built in tutorial.

Our products include many online features that are unique in the online gaming industry, the successful candidates will be responsible for creating 2D and 3D art assets to support new features within current products and future developments.

All roles require hardworking team players.

Junior Artist

This role will require a talented computer graphics artist with skills founded on good traditional art skills. The successful candidate will be responsible for creating graphical assets for use in building variations of our base products and assisting with art required for the implementation of new features within the base products. Variations to the base products will include “skinning” the product in the style required for new brands and regional localization.

The following skills will be required:

- Good grounding in traditional art skills.
- Fully conversant with 2D graphical art packages (primarily Photoshop).
- Experience with 3D art packages such as 3D studio.
- HTML and Flash skills.

Would suit candidates who have gained the above experience through the games industry or who are looking to become involved in games with suitable experience from other sectors.
